Several games are released every day. However, the vast majority have a very similar plot, making them very similar, changing only the graphics and small details. This causes some users to get tired of the story. The case of Nine Dragons is completely different. The game is all set with Oriental details as it takes place in China, and has as its main reference the most varied forms of Kung Fu. 9Dragons, as it is also known, has as its background the Ming Dynasty, including geographical points known around the world, such as the Great Wall, and also has some true historical details. Nine Dragons allows you to choose from 9 different clans, or as the name itself says nine dragons. Therefore, it is advisable that you know everyone before choosing, since each has unique characteristics. In addition, they will show the side he will have to defend, because one party is in favor of the emperor, while the rest intends to strip him of power. Without guns One of the differentials is the fact that there are no shots fired. In 9Dragons all struggles are unarmed. In it the most is knowing how to attack your opponent well. One of the drawbacks of the game, at least for those who are just starting out, is the fact that it is very difficult to make the punches, since the mouse é toda feita pelo. Cadastro Antes de comçar a jogar Nine Dragons é necessário is registered no site do desenvolverdor. For isso, just click here. O cadastro é muito parecido com o da grande maioria dos MMORPG. Desse modo, não nos concern, já que não will be difficult nem demorado. Sticks and stones can break your bones, but this will protect you from almost everything else. Final Fantasy Tactics A2: Grimoire of the Rift description The Ribbon is a recurring piece of accessories and armor from the Final Fantasy series, although it sometimes appears as an attribute of the team, and has also appeared as a supporting ability. Final Fantasy VIII[|edit |] Edition] The support capacity of the tape can be taught to any Guardian Force with the ribbon element obtained through Chocobo World. No Guardian Force naturally learns Ribbon, and you can't get through any other means, so it's a skill most international players never get. When equipped, it protects the bearer against the entire state A Final Fantasy VIII Remastered Angelo Search yields all previously exclusive Chocobo World articles, including the tape. Final Fantasy IX[edits | an editing source] Element that always keeps Mog by your side Description Tape does not prevent status effects as the player can learn support skills to immunize against diseases. Instead, Ribbon is an add-on obtained from Mog that allows Eiko to learn how to summon Madaen. It also teaches him guardian Mog's supporting ability to eliminate all negative Eiko states (except KO) at the end of a battle. Instead of preventing the usual state, the tapes slow down the damage caused by fire, ice, lightning and the Saint and absorbs water and wind. It is obtained during the events on Mount Gulug, found during the Chocobo sidequest in Chocograph #24, donated by Siltzkin after buying everything from him on his trip, and bought from the Treno Auction House (final). Eiko has the tape in her bring arts figure. Tetra Master[editing source] Tetra Master #076Location: Award in hippaul racing minigame (reach level 50)Black Mage No. 56 (disc 4; Black Mage Village Cemetery)Memoria (Defense Phantom in Recollection room, Rare Phantom in Time Warp room) Final Fantasy X[edits | edit source] In pal, International, and HD Remaster versions, Ribbon can be customized to any armor through x99 Dark Matter to make the carrier immune to Zombie, Petrification, Poison, Confusing, Berserk, Sleep, Silence, Slow, Darkness and Darkness. It does not provide protection against instant death, curse, Power Break, Magic Break, Armor Break, Mental Break, Eject, or Delay. Dark aarkons sometimes release armor with tape already on it. The tape is the most dominant ability and the second most dominant combination of skill, and therefore most armor with equipped tape are called as such. The only exception is that when both the HP break limit and break MP Limit skills appear customized in the same piece of armor. When a piece of armor is customized with Ribbon as the dominant capacity becomes Sanctuary for Tidus; Holy Ring for Yuna; Solidiry for Auron; Closure for wakka; Acropolis for Kimahri; Eternity for lulu; Waterproof for Rikku. Armor with four status test skills becomes black tape for lulu; Paladin shield for Tidus; Forbidden ring for Yuna; Undeateated by Auron; Wakka goalkeeper; Ronso bracelet for Kimahri; Argonaut by Rikku. It is less than one tape-equipped element, as it only prevents four of the nine states on the tape from being protected, and occupies four slots, where a tape capacity would take only one. Final Fantasy X-2[edits an editing source] Ribbon is an accessory and also a self-ability for the Mascot and each special dress sphere, and the ability gained to go | for all the colorful doors on the clothes grid international and HD Remaster versions. The accessory can be found on the Bevelle Metro, in the area with the six towers. The activation of the correct three (blue) will allow the player to continue with the story, but and manipulating the six towers to form a spiral path allows the player to access the tape. In the HD Remaster, the opening of this chest awards treasure hunter's trophy/achievement. The accessory falls from Angra Mainyu, and can be bribed from Falling Ochu (Oversoul, rare), Ultima Weapon (normal and Oversoul), and Omega Weapon (normal and Oversoul). It can also be obtained from the tower's re-calibration minigame on the thunder plains, thus allowing three ribbons in one playthrough, without the use of Bribery. Final Fantasy XII[] source] There are several ribbons of various colors. Low-level and mid-level tapes will give little defense against all elements, but the damage advocated is easy to overlook. The flawless tape, which is hard to achieve, will also give a decent amount of elementary defense and the ability to resist state diseases. Some tapes, such as noble tape, also provide a bonus of charisma, making them popular with bards. Final Fantasy XIII[|edit|] source] In the original version, Ribbons protects against all diseases in the state except instant death, X-zone and stone. It will avoid bait, but not Berserk. The player can get more than one tape by repeatedly testing the chest.
